Final Greetings from Isla Lobos, Uruguay.

Just a few final photos from the colony. 1st picture is of two male sea lions fighting to maintain their territories. This is the prime time as females are coming into estrus, so the stakes are high. The second is of a sea lion pup with a sea gull behind it and finally a picture of the fur seal colony at the back end of the Island. While there are around 100 sea lions, there are many more fur seals over 10,000 on this island. I hope you enjoyed the mini travel blog. We had an enjoyable and productive field season.

Best,
Dan Costa
