2013 Keynote Speaker

Majora Carter, ECO Entrepreneur

“If we had placed our energy, transport, waste, and agribusiness infrastructure near wealthy people as easily as we have near poor people, we would have had a clean and green economy decades ago.”

“At Institute for Sustainable Infrastructure, we believe Envision will become the prime infrastructure rating tool for sustainability in the United States. Becoming a credentialed sustainability professional, ENV SP, will become a key credential for all sustainability professionals before 2014.”

Terry Neimeyer

PE, ENV SP
Chief Executive Officer
KCI Technologies Inc.

Chairman Elect,
Board of Directors,
Institute for Sustainable
Infrastructure

“Focusing on green issues is not just good for the environment, but also good for business.”

Erika Marsillac, Ph.D.

Assistant Professor of Maritime and Supply Chain Management at Old Dominion University

“Scientists of Old Dominion University's Climate Change and Sea Level Rise Initiative conduct research that will help us better understand the science behind sea level rise and its impact on Hampton Roads. A key mission is collaboration between ocean scientists, economists, engineers, city planners, Navy personnel and other local entities to help the region cope and adapt to sea level rise and climate change.”

Tal Ezer, Ph.D.

Professor of Ocean, Earth & Atmospheric Sciences (OEAS) Affiliated Faculty, VA Modeling, Analysis & Simulation Center (VMASC) Old Dominion University

INCLUDED TOPICS

- Energy and Infrastructure
- Greenhouse Gas Inventories for Cities
- Sustainability and the 21st Century Learning Environment
- Civil Infrastructure for Future Generations: A Sustainable Way Forward
- The Latest in Solar Energy
- Supply Chain Modifications in an Era of Green Energy
- Stewardship and Sustainability
- The Canopy House
- An Update on Offshore Wind in Virginia

- Connecting Green Building Outcomes to Enterprise Sustainability Programs
- Hybrid Power Systems in Energy Recovery
- Nanostructured Materials to Enhance Heat Transfer in Ultra High Energy Systems
- Sea Level Rise Panel
- Industry Challenges for Environmental Compliance
- Virginia's First Net Zero Building: Chesapeake Bay Foundation's Brock Environmental Center
